Summary

AI-enabled Software Developer with strong foundation in Java, Spring Boot, and JavaScript. Experienced in building REST APIs and integrating AI systems including Retrieval-Augmented Generation (RAG) using LangChain and FAISS. Skilled in data processing, ETL workflows, and developing scalable applications.

Work Experience

Ajinkya Surface Coating

Java Backend Developer (Freelance)

Pune

Aug 2025 – Nov 2025

- Developed backend services using Java, Spring Boot, and MySQL.
- Designed REST APIs and integrated database operations using JPA/Hibernate.
- Improved application performance through optimized query handling.

Projects

RAG-based Intelligent Q&A System

Python, LangChain, FAISS

- Built end-to-end Retrieval-Augmented Generation system using embeddings and vector search.
- Implemented document chunking, semantic retrieval, and context-aware LLM responses.
- Designed scalable pipeline for intelligent question answering over unstructured data.

Secure Task Management API

Java, Spring Boot, MySQL

- Developed REST APIs with JWT authentication, pagination, and role-based access.
- Implemented layered architecture with validation and exception handling.
- Optimized database queries for improved performance.

AI Chat Web Interface

HTML, CSS, JavaScript

- Built responsive UI and integrated async API calls using fetch and Promises.
- Handled real-time responses and dynamic rendering of chat data.
- Connected frontend with backend AI services for interaction.

Technical Skills

Languages: Java (OOP, DSA), JavaScript (Async/Await, Promises), Python(Basic)

Frontend: HTML, CSS, JavaScript

Backend: Spring Boot, REST APIs ,SQL

AI/ML: Machine Learning, Transformer,LLM, RAG, LangChain, FAISS

Data: ETL, Data Annotation, Pandas, NumPy , Seaborn.

Tools: Git, Postman

Concepts: DBMS, OS, Computer Networks, Client-Server Architecture.

Education

Sinhgad College of Engineering

2025

B.E. Information Technology

CGPA: 8.0

Numavi Junior College

2021

HSC Science

Percentage: 79
